

Founded in 2012 by Chief Executive Officer Donald Jones, BlackFish Federal is an IT, business support, and healthcare solutions 8(a)-certified company, dedicated to the thoughtful pursuit of solving customers' business obstacles. Whether through applying innovative IT solutions or providing healthcare management support services, BlackFish consultants use their problem-solving skills to turn challenges into opportunities.

In 2018, BlackFish acquired AMTIS, Inc. (AMTIS) to provide a solid platform for continued growth. This acquisition combined the talented staff, experience, and capabilities of both firms. AMTIS brings extensive experience in maintaining and operating ocean-going and small watercraft, training and evaluation, professional, and business processing services. ISO 9001:2015 certified and appraised at CMMI Services v1.3 maturity level 2, these services are supported by high quality, standardized, and repeatable processes.

BlackFish is a Prime Contractor in SeaPort NxG, GSA's ASTRO Multiple Award Schedule Maritime Pool, and U.S. Army Watercraft Inspection Branch; and is a member of the Huntington Ingalls Industries' Army Watercraft Sustainment Program Zone 3 contract team. BlackFish watercraft services include:

Maintenance

Preventive Maintenance Checks and Services (PMCS) and repairs: diesel mechanical, welding, air conditioning and refrigeration (AC&R), and electrical components. This includes tune ups or shipboard rebuild and removing the equipment and reinstalling it after factory repairs are completed.

Program & Records Management

We have created databases to keep track of boatyard and port-side repairs. Includes dollars spent, long lead time parts, On-Condition Cycle Maintenance dates, and annual operational certificates. Keeping track of ongoing boatyard repairs, cost, and delays for each vessel.

Marine Surveyor Services

Surveyors go into the boatyards and conduct daily checks and painting and electronic inspections.

Budgeting and Long-range Planning

Determine yearly budgets and spare parts inventory levels. Produce 7-year maintenance projections.

Service Life and Depot Standards

Create depot level maintenance standards used in boatyards. Rewriting manuals for use in addressing boatyard requirements.

Boatyard Contracting Support

Lead contract writers for vessels undergoing Service Life Extension Program (SLEP). Compile specification item cost estimates which become the foundation for judging a bidding contractor's offer.

Foreign Military Sales

Prepare for transfer: condition, location, and owning unit. Once sale approved, update the database and maintenance schedule, track until removed from inventory.
